RESPONSIBLE RESEARCH AND INNOVATION

**SHAPING NEW HORIZONS**

**Go4 JOINT FINAL CONFERENCE:**

*“Responsible Research and Innovation in Europe and across the  
World - Shaping new Horizons”*

**14 - 15 January 2016**

**Brussels, Belgium**

ProGReSS

The four FP7-funded projects, launched in February 2013; **GREAT**, **Res-AGorA**, **ProGRess**, and **Responsibility** (Go4 projects), are sharing a common concern, to improve understanding of the emerging concept of Responsible Research and Innovation (RRI) and develop approaches, tools and mechanisms to facilitate the uptake of RRI across Europe and beyond.

In early 2016, after three years of intensive work, the Go4 projects will present key results of their work, at a joint final conference, which will maximize the potential impact of their scientific output through the direct and open communication with researchers, policy-makers and a broad range of stakeholders.

The **key themes** that will be addressed during the conference are:

- How can Responsible Research and Innovation shape new horizons?
- RRI: From theory to practice
- RRI and Governance
- RRI and the current EU policy-landscape
- Implementing RRI
- Global voices: what is the international dimension of RRI?
- The evolution of RRI
- RRI case studies and success stories
- What are RRI priorities and how to address them?
- How can RRI be evaluated?
- RRI - the way forward

Please stay tuned for details about registration, venue and updates of the programme.
